Profile Settings

Update your display name, email and profile photo

On the Connections page, scroll down and click on **Register your Application**

On the next page, give the application a **Name**, and for the **Redirect URI**, enter <http://localhost>. Then click **Register**.

Register your Application

Register a new application that uses the [Twitch API](#) to interact with Twitch.

Name

Displayed to users when authorizing your application.

Redirect URI

Will receive the result of all client authorizations: either an access token or a failure message. This must exactly match the `redirect_uri` parameter passed to the [authorization endpoint](#). When testing locally, you can set this to `http://localhost`.

Register 

You will need the **Client ID** when using my application.

Manage Application: Name goes here

Name

Displayed to users when authorizing your application.

Redirect URI

Will receive the result of all client authorizations: either an access token or a failure message. This must exactly match the `redirect_uri` parameter passed to the [authorization endpoint](#). When testing locally, you can set this to `http://localhost`.

Client ID

Passed to authorization endpoints to identify your application. You cannot change your application's client id.
